Through an enquiry approach, our curriculum is responsive. We nurture, develop and build on children's interests and passions; make links to their local environment so that learning is relevant, lifelong and builds the broad skills and knowledge for the world ahead. With an ethical focus in which children learn about rights, through rights and for rights, our children have the confidence to question the world around them, allowing them to be active participants to shape their community. Our children are stewards of the environment, developing strong core moral values which celebrates openness, diversity, and equity.

This document provides an overview of the planned sequence of learning for a term. Actual teaching and timings may differ as teachers adapt teaching and learning opportunities as they teach to ensure teaching is responsive to children's needs.

Science	 Hypothesise about what is in an egg at various stages of incubation Research the development of a chick and understand that it is a baby chicken Discuss and research what the chicks will need to grow into healthy adults 	Become familiar with animals and their babies through matching card activities and discussion Understand that humans are animals and that we produce offspring Plan questions for visitors thinking carefully about what information they want to gather and how to phrase the question accordingly Interact and observe the visitors, recording their answers to questions and gathering information	Consider the differences and similarities between what they want and what they need to survive. Discuss and draw up a list of essential items for basic survival. Discuss together questions to assess learning, such as: what do humans need to survive? Why do you need food? Why do you need water? What do animals need to survive? Is there a difference?	 Understand that exercise makes the heart work harder and is an essential part of a healthy lifestyle Explore the idea of warming up muscles through a simple investigation Warm up and then carousel around different physical activities, counting rate of heartbeat Observe and record the effects of exercise (warm skin, thirsty, heart rate increased, breathing heavily). 	Explore different lunch box foods and begin to look at the nutritional labelling Discuss and research what is meant by a balanced meal and food types Design a balanced lunch box on paper to serve as a reminder of how much of each food group is required for a balance lunch	 Understand that washing your hands before eating is part of a healthy, hygienic lifestyle By drawing on previous knowledge, select healthy sandwiches to pack in the picnic 	 Record the healthy picnic in photographs and talk about their learning with their guests Interview their guests about their picnic experience
