village	a settlement with houses and buildings, larger than a hamlet, smaller than a town
suburb	an area or community located just outside a city or town
conurbation	a huge urban area where several cities and towns have joined together
rural	in the countryside
urban	related to cities or towns

Loss of animal habitat and green spaces is a key environmental issue across the globe. It is one of the global goals.

Skills - We are geographers!

1. Use aerial images and graphs to find and discuss geographical information.	
2. Observe and collect information and data from fieldwork.	
3. Use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods.	

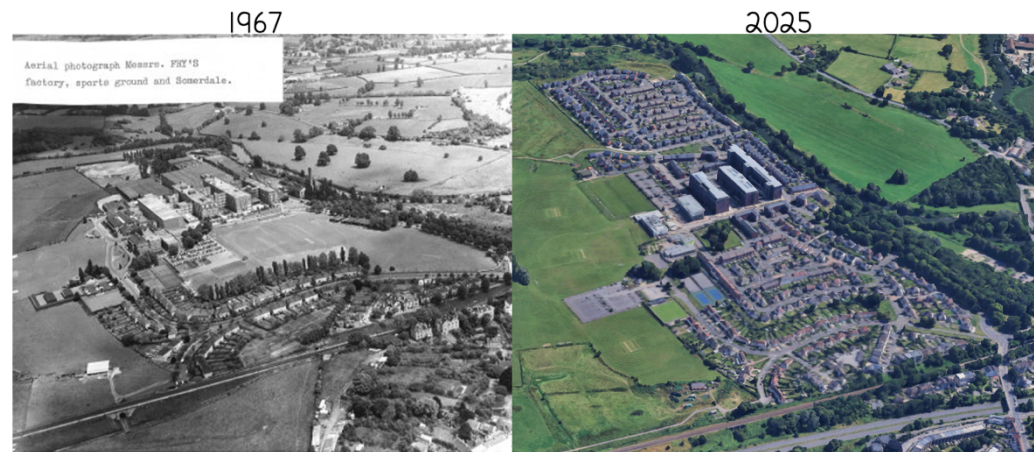

Year 3 Term

How has our local area changed?
How could we improve our school environment?

Key knowledge:

1. Somerdale is in Keynsham which is in Bath & North East Somerset.
2. Rural areas often have lower impact on the environment, wildlife and nature than urban areas as there are less buildings, less roads and there is less noise.
3. Aerial images and photographs show how our local area has changed over time.

4. Examples of ways to help environmental issues: litter picking, gardening, visiting and supporting green spaces, creating habitats for animals and insects like bug hotels, and recycling properly.
